KEY:

- 1) The light speed in the vacuum in m/s
- 2) In which year CERN was founded?
- 3) Which is the LHC magnet temperature (mind the comma )?
- 4) How many km long is the LHC?
- 5) How many magnets are there at the LHC
- 6) Which is the  $\pi$  value (the number you need to compute the circle circumference)?
- 7) If you travel from Italy to CERN you enter the Monte Bianco tunnel, which is the Monte Bianco height (it's a mountain)?
